

DL&Big Data 2026 Project

Deep Network Training for mRNA Stability Prediction

mRNA Stability

- mRNA degradation factors

PubMed: 17245413

PubMed: 29018283

Dataset

- 0: highly degraded mRNAs
- 1: lowly degraded mRNAs
- Transcript name, 5'UTR sequence, CDS sequence, 3'UTR sequence, Label

Requirements

- Minimum requirements (70%)
 - 5-fold CV results: at least 75% in auROC
- Additional Results
 - Test set results: > 85% (20%)
 - Ranking of your auROC performance in the class (10%)

Reports

- Your reports should include the following:
 - Model architecture & final hyper-parameters used for model training
 - The 5-fold CV learning curves
 - The auROC/auPRC and the complete list of evaluation metrics (recall, precision, specificity, F1, auROC, auPRC) on
 - 5-fold CV results
 - Test results
